I EXECUTIVE SUMMARY

CDW Consultants, Inc. (CDW) conducted an investigation of the properties located at 240 Beaver Street and 225-227 Beaver Street, in Waltham, Massachusetts (MA) (the "Site") on behalf of the City of Waltham. The Site includes two separate parcels of land totaling 58.7 acres. The Site contains one main 7,474 square foot administration building built in 1948 and two other support buildings and greenhouses. The properties are owned by the Commonwealth of Massachusetts and are listed on the City Assessor database under the following parcel identification numbers: R053 003 0001and R053 003 0014 (240 Beaver Street) and R054 001 0001 (225-227 Beaver Street). Figure 1 depicts the Site locus. Figures 2 and 3 are Site Plans for 225-227 Beaver Street and 240 Beaver Street, respectively.

The Site investigation was conducted in general conformance with the ASTM International (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-13) and the Massachusetts General Laws (MGL) Part I, Title II, Chapter 21E: Massachusetts Oil and Hazardous Material Release Prevention and Response Act.

On April 30, 2019, CDW personnel performed a Site reconnaissance to conduct a general visual inspection of the Site, observe the interior of the Site building, and document existing and observable uses of the Site and adjacent properties. A User Questionnaire was completed by Mr. Fred Leland, Maintenance for the facility.

The investigation conducted by CDW personnel included a review of available federal, state, and local environmental agency records to identify the presence or likely presence of Recognized Environmental Conditions (RECs), Historical Recognized Environmental Condition (HRECs) and Controlled Recognized Environmental Condition (CRECs).

The following CREC was identified during the assessment:

> A CREC was identified on the northern Parcel 2 located at 225-227 Beaver Street where a portion of the parcel is identified as a Massachusetts Waste Disposal Site that has been assigned Release Tracking Number (RTN) 3-28049 for a release of heavy metals. A Class C-1 Response Action Outcome (RAO) was filed with Massachusetts Department of Environmental Protection (MassDEP) in November 2011 stating a condition of No Significant Risk of harm to human health exists for all current uses of the Disposal Site Area (DSA) and that it is infeasible to reach a Permanent Solution. The C1 RAO stated the disposal site boundary must be controlled with a fence. In 2011, a 6-foot tall chain link fence was installed around the DSA. A Periodic Review is conducted every five years. The last Periodic Review was conducted in July 2016 by Ramboll Environ.

The following HRECs were identified during the assessment:

- An HREC was identified on the southern Parcel 1 located at 240 Beaver Street where a portion of the parcel is listed as a Massachusetts Waste Disposal Site that has been assigned Release Tracking Number 3-28048 for a release of oil. A Class B-1 RAO was submitted to MassDEP on October 5, 2009 as assessments of the release have demonstrated that No Significant Risk exists as a result of the release and therefore site closure has been achieved.

- An HREC was identified on the southern Parcel 1 located at 240 Beaver Street where a portion of the parcel is listed as a Massachusetts Waste Disposal Site that has been assigned Release Tracking Number 3-28050 for a release condition of heavy metals in soil. A Class A-1 RAO was submitted to MassDEP on October 11, 2009 after soil remediation was completed, demonstrating that No Significant Risk exists as a result of the release and therefore site closure has been achieved.

Parcel 1 (240 Beaver Street) was the site of an upland fly ash research area, and Parcel 2 (225-227 Beaver Street) was the site of a wetlands fly ash research area. According to the maintenance foreman for Parcel 1, arsenic based pesticides and herbicides had been stored on-site, and used in the past inside the greenhouses.

An asbestos survey was beyond the scope of this assessment. However, it was previously documented in the document entitled, Waltham Experiment Station, Study of Existing Conditions, Development Potential, and Alternative Future Development Options. The section on the Regulated Building Materials Survey (RBMS) identified the following locations contained asbestos containing materials (ACM):

- Countertops and panels in the Parcel 1 Administration Building;
- Inside the laboratory, inside the sink countertops and panels in the Parcel 1 Gray Building;
- In the boiler smokestack in the Parcel 1 Boiler Building;
- In the linoleum floor located inside the Parcel 2 Farm House;
- In the asphalt roof shingles and transite panels within the Parcel 2 Main Barn;
- In the building materials within the Parcel 2 cow barn;
- In the building materials and shingles of Parcel 2 sheds 1 and 2.

No assessment of the potential for asbestos in soil was reviewed or performed as part of this scope or

work.

II SITE DESCRIPTION

CDW conducted an ASTM Phase I investigation of the properties listed as 240 Beaver Street and 225-227 Beaver Street, in Waltham, Massachusetts (the "Site"; Figure 1). The assessment includes one 27.9-acre parcel located at 240 Beaver Street and one 30.84-acre parcel located at 225-227 Beaver Street. Both properties comprise the University of Massachusetts Agriculture Experiment Station that was gifted to the Commonwealth in the early 1900s for educational purposes.

Parcel 1 (240 Beaver St) consists of administration buildings, greenhouses, a research area, small community garden plots, and agricultural fields. This parcel is bounded by Beaver Street to the north, a baseball field and Waverly Oaks road to the east and southeast, Marianne Road to the south, and Linden Street and the residential properties at Linen Circle and Floral Circle to the west. The southern parcel (referenced as parcel #1) is located at 240 Beaver Street and is improved with a 7,474 square foot administration building built in 1948. The three-story building has approximately 20 offices and an attached auditorium of approximately 5,000 square feet. It is currently used for office space and is known as the main building of the Waltham Experiment Station. The parcel also contains the Gray Workshop Building with four attached greenhouses, a Boiler Building that formerly generated heat for the buildings, the Corn Laboratory with two attached greenhouses, and hoop-style greenhouses. The Administration Building, Gray Workshop Building and the Boiler Building are the main structures currently in use. The parcel is bordered by the Cornelia Warren Ball Fields to the east, Waverly Oaks Road- Route 60 to the south and a residential neighborhood to the west. Access to Parcel 1 is via three gravel driveways that enter the site from Beaver Street. Two driveways provide access and parking along the east, west, and south side of the administration building and the other provides access along the eastern side of the Gray Workshop Building with parking on the south side of the building.

The Parcel 1 buildings are connected to municipal water, sewer and natural gas. The Administration Building was formerly heated with #2 fuel oil, supplied by two 7,500-gallon underground storage tanks (USTs). The Gray Building was heated with #2 fuel oil, supplied by one 1,000-gallon UST.

Parcel 2 (225-227 Beaver Street) consists of an abandoned farmhouse and dairy farm buildings including barns, storage sheds, and foundation structures for former buildings. Most of these structures are in disrepair and several have collapsed. The upland field west of the wetland was used for hay production and grazing. The northern portion of this parcel contains approximately 16 acres of wetlands, meadow and succession forest vegetation. The wet meadow and wetland areas were not developed. The parcel is bounded to the north by the Fernald State School, to the south by Waverly Oaks Road and Beaver Street, to the west by Camp Cedar Hill and associated buildings owned by

the Girl Scouts of Eastern Massachusetts, and to the east by Waverly Oaks Road. The wetlands contain an approximately 4,600 square feet area of contaminated fly ash material brought from an off-site source used for an agricultural research experiment conducted in the 1970's known as the Phoenix Project (a joint USEPA, Mass DEP and City of Waltham DPW project).

According to a July 2016 Periodic Review Class C1 Response Action Outcome by Ramboll Environ, the UMASS experimental station disposed of approximately 66 to 77 tons of municipal incinerator ash residue on Parcel 2 during the summer of 1977. No buildings were known to have been constructed on or near the ash disposal site. The upland field west of the disposal site was used for hay production and/or grazing of cows. The wet meadow was never developed.

The Site is located on the Boston Southwest United States Geological Survey (USGS) 1987 Quadrangle Map at the following approximate location and elevation:

Southern Parcel 1	
Universal Transverse Mercator (UTM) Zone 19 Coordinates	
317708.01	UTM E (Meters)
4694755.68	UTM N (Meters)
Latitude/Longitude	
42.383709°	Latitude (North)
-71.214428°	Longitude (West)
Elevation	
58	Feet above sea level

Northern Parcel 2	
Universal Transverse Mercator (UTM) Zone 19 Coordinates	
318032.00	UTM E (Meters)
4694878.00	UTM N (Meters)
Latitude/Longitude	
42.384886°	Latitude (North)
-71.210534°	Longitude (West)
Elevation	
58-48	Feet above sea level

III USER-PROVIDED INFORMATION

Mr. Fred Leland, Maintenance for the facility was interviewed on April 30, 2019 regarding the Site. Additional site information was provided by Stacy Daley of the Community Farms Outreach. They provided the following information:

- Currently the Parcel 1 administration building is occupied by the Boston Gleaners, Community Farms Outreach, and other farm cooperatives.
- Water, sewer, and natural gas utilities enter the property from Beaver Street.
- There are no private drinking water wells or irrigation wells located at the Site.
- The greenhouse buildings (greenhouses 1 to 4) have been in a state of disrepair for an unknown number of years. Mr. Leland stated that arsenic-based pesticides and herbicides had been used in the past inside the greenhouses.
- A gasoline tank outside the western side of the greenhouse had a release of gasoline and was removed in January 1998.
- Mr. Leland stated other UST's were removed from adjacent to the Corn Lab, north of building the Gray Building, northeast of greenhouse #3, and south of the Boiler Building at various times in the 1990's.
- No personnel reported any knowledge of pits, ponds or lagoons for waste treatment at the Site.
- The Parcel 1 site had been used for fly ash experiments in areas to the south east of the buildings in the past. The fly ash experiments were conducted in the south east area of 240 Beaver Street adjacent to the dirt access road.
- A portion of the Parcel 2 site was used for fly ash experiments. This area has been located approximately 300 feet east of the driveway adjacent to the wetlands area.
- Dumping of farm materials and yard waste such as leaf litter, stumps, loam, tree branches, grass, and wood chips has been located along the southern most portion of Parcel 1 closest to Marianne Road near Waverly Oaks Road. Dumping from off-site sources is suspected by the City.
- Drywells have existed on Parcel 1 for washing of pots and other farm tools.

- A pesticides storage building is located south of the Parcel 1 greenhouses and in the past has stored dry phosphates, chlordane, liquid pesticides, and dry diazanon.

IV SITE RECONNAISSANCE

On April 30, 2019, CDW's inspector Ms. Laura Dewahl performed a walking inspection of 225-227 Beaver Street and 240 Beaver Street in Waltham, Massachusetts. CDW was accompanied by Mr. Fred Leland. The weather conditions were mild (40s (F)) and rainy at the time of the site inspection. Access was provided to approximately 50% of the Site buildings due to some safety concerns and inaccessibility of some buildings. No restricted areas were encountered for the exterior portion of the property grounds.

1.0 General Exterior Observations

Parcel 1 - 240 Beaver Street

This portion of the property is approximately 28 acres. Approximately 90% of the exterior property is undeveloped and includes a former rose garden, Waltham Fields Community Farm, and City of Waltham Community Gardens. The area along the northern portion of the parcel just south of Beaver Street contains "Hoop Houses", one three-story administration building, one former boiler plant, one two-story wood framed building known as the "Gray Building", one pesticide storage building, four former greenhouses, and two unknown use greenhouses.

During the site walk, the farm fields were being prepared for the seasonal planting. No stressed vegetation or soil staining was observed. Site reconnaissance of the former "fly ash" experiment area did not identify and areas of stressed vegetation or stressed farm plants. No containers such as 55-gallon drums, former above ground storage tanks (ASTs), or other hazardous materials storage containers were observed.

Mr. Leland stated that many of the former dry wells associated with the greenhouses and the Gray Building had been removed but was unsure of the date. No staining surrounding the various buildings was observed.

No evidence of suspect waste disposal pits was observed in the numerous farm fields to the south of the greenhouses and administration building during the Site inspection. The vegetation was healthy looking and did not appear stressed.

At the southern end of the site in a wooded area closest to Waverly Oaks Road an area reportedly used for dumping yard wastes, any excavated excess soil, leaf litter, brush, and grass clippings. On the northern edge of the dumping area a former 275-gallon heating oil tank with the top removed and no contents was observed. Dried leaves outside of the former AST did not contain any obvious signs of oil or hazardous materials. The edges of the fill in area had large pieces of asphalt and concrete. During the site visit it is unknown if any of the former "fly ash" areas from other parts of the site have been removed and transported to the southern fill area.

No pits, mounded areas, or waste lagoons were observed.

Various one gallon to five gallon plastic containers with oil or hydraulic fluids were observed inside the storage huts along the eastern dirt service road. Various motorized farm implements were stored inside the huts as well. No obvious signs of leaks or impacted surface soils was observed.

Parcel 2 - 225-227 Beaver Street

This portion of the property is approximately 30 acres. Approximately 90% of the exterior property is undeveloped with low growing vegetation and trees. The eastern 10 to 15 acres is listed as a MassGIS Delineated Wetland. Some wetland flagging remnants were observed.

The area to the northern portion of the property includes a two-story farm-house, garage, main barn, and calf barn. An area to the south of the calf barn was reportedly used as an oil changing station. An unknown number of rusted 5-gallon steel cans and other containers were observed in the areas to the north of the farm-house. The contents of the containers were unable to be verified. No obvious staining or impacted soils were observed.

A former "fly ash" area was reportedly located in the southern portion of the parcel closer to Beaver Street. No stressed vegetation was observed around the buildings or former "fly ash" area. A chain link fence was located around the main barn due to the collapse of the barn. No stressed vegetation was observed in the area of the reported oil changing station. Approximately 200 feet east of the farm-house was a milk bottle glass dumping area.

2.0 General Interior Observations of Building

Observations of the inside of the building are organized by building.

240 Beaver Street

Administration Building

The three-story main administration building is located closest to Beaver Street. The basement area was accessible during the site visit. Minor amounts of petroleum products, paints, cleaning materials, and other maintenance materials were observed. No staining or spills of oil or hazardous materials was observed. Basement floor drains did not appear to be impacted by oil or hazardous materials. Site reconnaissance of the upper floors did not identify any improperly stored oil or hazardous materials. Minor amounts of cleaning supplies were observed in the kitchen, bathroom, and janitor areas. No obvious signs of oil or hazardous materials spills were observed. The building is heated by natural gas. The natural gas line enters the former boiler plant prior to entering the basement area furnace.

Gray Building

The Gray Building is located 100 feet to the east of the administration building closest to Beaver Street. The lower basement area accessed by an overhead garage door on the eastern side of the building contains various small pieces of landscape equipment such as snow blowers, leaf blowers, and lawn mowers. The area also contains a small engine repair area. Minor amounts of engine oil, lubricants and gasoline was stored in the area. No obvious staining was observed on the concrete floor around a floor drain and one exterior trench drain. No holes or significant cracks in the concrete floor was observed. Standing water from recent heavy rain observed on the floor did not indicate the presence of a petroleum sheen. A portion of the Gray Building is undergoing abatement for asbestos containing building materials.

Greenhouses 1 to 4

Greenhouses 1 to 4 located to the south of the Gray Building and to the east of the Administration Building and Boiler House were dilapidated and were not entered out of safety concern. No obvious signs of storage of oil or hazardous materials was observed. The area was surrounded by chain link fencing. Arsenic based pesticides and herbicides were reportedly used in the greenhouses.

Greenhouses 6 and 7

Greenhouses 6 and 7 are located to the east of the dirt service road. These greenhouses are currently in use. During the site visit small amounts of oil and lubricating oils were observed in containers ranging from one to five gallons. They were stored on a plastic pan at the northeast corner of the greenhouse. No obvious signs of spills or staining was observed in the plastic container or surrounding surface soils.

Boiler House

Due to what appeared to be a partial roof collapse, the interior of the former boiler plant was not accessed. Limited visual observations from the outside did not identify storage or the misuse of oil or hazardous materials at the time of the limited inspection. No odors were observed emanating from the building. An electric transformer is located along the northern exterior portion of the boiler plant building.

225-227 Beaver Street

Farm House and Garage

The two-story wood framed house was inaccessible at the time of the site visit. During the exterior reconnaissance two different heating oil fill pipes and vents pipes were observed exiting the north side of the basement. No oil or hazardous materials were observed on the outside of the building.

Main Barn

The area surrounding the Main Barn was secured with a locked chain link fence due to the collapse of the building. The building appeared unsafe at the time of the site visit. No entry was made beyond the fence line. No obvious signs of petroleum or hazardous materials staining was observed in the area of the barn or former oil changing area from what could be observed through the fence.

Calf Barn

The area surrounding the calf barn was secured with chain link fencing due to structural collapse. The area surrounding the fenced area did not identify any stressed vegetation or areas of obvious oil or hazardous materials. No obvious containers for storage of oil or hazardous materials were observed.

3.0 Observations by Focus Area

Petroleum Products

All known in-use underground storage tanks have been removed from the site. One 1,000 gallon gasoline UST removed from the southeast corner of greenhouse #3 identified a release of approximately 196-gallons of gasoline. The UST closure report is documented through Pennoni and Associates dated March 13, 1998. No other closure reports were reviewed for any of the remaining UST's. There are no active above ground storage tanks (ASTs) located at the site. Natural gas has supplied the building since approximately 2001.

Hazardous Materials

Cleaning supplies and kitchen chemical fire suppression systems are located at the Site administration building. The storage of these materials appeared to be satisfactory. Also present but not directly observed are refrigerants for kitchens and water fountains. Propane tanks are located in the area of greenhouses 6 and 7.

Drums or Containers

No drums were observed during the exterior site inspection. No drums were observed during the interior building site inspections. Various small containers, i.e., 5-gallon capacity or less, were observed as noted.

Underground Storage Tanks (UST's)/Aboveground Storage Tanks (AST's)

Former UST's include:

- One 1,000-gallon gasoline UST located northeast of greenhouse #3 was removed in February 1983.
- One 1,000-gallon gasoline UST located between greenhouse #3 and #4 removed in December 1991.
- One 1,000-gallon #2 fuel oil UST located northwest of the Gray Building was removed in December 1992.
- One 500-gallon fuel oil UST was removed in December 1992.Two former 7,500-gallon fuel oil UST's located to the south of the former boiler plant building were reportedly removed in 2001.

Intermodal Shipping Containers

There were no indications of intermodal shipping containers at the subject property at the time of the inspection.

Indications of Polychlorinated Biphenyls (PCBs)

Polychlorinated biphenyls (PCBs) are a chemical component of many dielectric fluids, heat transfer fluids, hydraulic fluids, lubricating oils, paints, or coatings manufactured prior to 1979. It is unknown if PCB light ballasts, PCB building caulking, and PCB window glazing is present in the building. A transformer located along the norther exterior wall of the former boiler plant may contain PCB oil.

Pits, Ponds & Lagoons

No evidence of pits, ponds and/or lagoons was noted on the subject property. Drywells were reportedly present on the Site in the past and were used for the purpose of washing pots and farm equipment.

Odors

No significant odors were noted on the subject property.

Stained Soil or Pavement

No evidence of significantly stained soil or pavement was noted on the subject property. No petroleum surface staining was observed around the boiler building or in the areas of the greenhouses where past UST's had been located.

Pools of Liquid

No unidentified pools of liquid were noted on the subject property.

Stressed Vegetation

No evidence of stressed vegetation anticipated to be caused by contamination was noted on the subject property.

Solid Waste Disposal

No solid waste concerns were noted on the subject property.

Medical/biological wastes/X-ray or other radioactive activities

No medical or biological wastes were observed.

Drains and Sumps

No catch basins were observed in the farming fields, surrounding dirt access roads, or greenhouse areas. A catch basin was observed in the driveway area along the north west corner of the Gray Building at 240 Beaver Street. The storm drain reportedly discharges out to Beaver Street. No staining was observed on the asphalted surfaces adjacent to the catch basin.

Septic Systems

No septic systems are in use on the subject property. The property is currently serviced by the City of Waltham sewer system.

Storm/Waste Water

Wastewater generated at the site is limited to sinks and toilets and is disposed of via the municipal sewer system. Stormwater drainage may be directed to the on-site catch basins.

Wells

No evidence of drinking water wells or irrigation wells was noted on the subject property. There are monitoring wells located on the property as a result of previous Response Actions conducted around the former boiler area UST's.

4.0 Records Review

4.1 Standard Environmental Record Sources

Relevant, readily available and practically reviewable documents, records, and other information were obtained and reviewed as part of this Phase I ESA. This chapter provides a list of sources of information and supporting documents.

Federal Source Records and Information

- Environmental Data Resources (EDR), Inc. federal environmental record databases search report prepared for CDW
- U.S. Geological Survey (USGS), Topographic Map of Boston North, Massachusetts, 7.5-minute series quadrangle

Commonwealth of Massachusetts Source Records and Information

- EDR, Inc. state environmental record databases search report prepared for CDW
- Records maintained by the Massachusetts Department of Environmental Protection; online database accessed at http://mass.gov/edep

Local (County and Municipal) Records and Information

- City of Waltham Assessor parcel information and ownership history
- City of Waltham Fire Prevention Division
- City of Waltham Health Department

- Historical aerial photographs of the subject property and vicinity obtained from EDR, Inc.
- Historical Sanborn Fire Insurance maps of the subject property and vicinity researched by EDR Inc. (Sanborns were not available for this property).

List	Standard Search Radius (Miles)
Federal National Priority List (NPL)	1.0
Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) List	0.5
CERCLIS No Further Remedial Action Planned (NFRAP) List	0.5
Resource Conservation and Recovery Act (RCRA) Corrective Action Sites (CORRACTS)	0.5
RCRA Non-CORRACTS	0.5
RCRA Generators	0.25
Emergency Response Notification System (ERNS)	Property Only
State-Equivalent NPL	1.0
State Landfill and/or Solid Waste Disposal Site Lists	0.5
State Leaking Underground Storage Tank (UST) Lists	0.5
State Registered UST Lists	0.25

CDW engaged EDR, Inc. to scan both federal and state environmental record databases and provide a summary of facilities that are identified on any of the lists searched. The federal databases searched, and specified search radii, are as follows:

4.2 Federal CERCLIS List

Superfund or Comprehensive Environmental Response, Compensation, and Liability Act of 1980 is a United States federal law designed to clean up sites contaminated with hazardous substances as well as broadly defined "pollutants or contaminants." There is one CERCLIS site located within 0.5 miles of the Site.

Name	Address	RTN/Status	Dist. (mi)/ Direction	Relative Elevation
Duffy Bros Construct	411 Waverly Oaks Rd	EPA ID MAD980916316	SW 1/4 - ½ mi	Higher

4.3 State-and tribal-equivalent- CERCLIS

State/Tribal Sites are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund or NPL) are identified along with sites where cleanup will be paid for by potentially responsible parties. Nineteen (19) State hazardous waste sites were identified within ½ miles of the Site. Information regarding hazardous waste sites, including associated Massachusetts Department of Environmental Protection (MassDEP) release tracking numbers (RTNs), is summarized below:

Name	Address	RTN/Status	Dist. (mi)/ Direction	Relative Elevation
Shell Product Dist P	313 Waverly Oaks Rd.	3-003078 RAO; 3-0018952 RAO; 3-0020538 RAO	ENE 0 – 1/8 (0.048 mi.)	Higher
Beaver Visitec Inter	411 Waverly Oaks Rd.	3-0000454 RAO; 3-0010717 RAO	ENE ¼ – ½ (0.292 mi.)	Higher
Rampage Systems	411 Waverly Oaks Rd.	3-031506 PSNC; 3-0025816 RAO	ENE ¼ – ½ (0.292 mi.)	Higher

Clematis Corporation	117 Beaver St.	3-0002692 RAO	E 0 – 1/8 (0.119 mi)	Lower
Light Metal Platers	70 to 74 Clematis Ave.	3-0016864 RAO	E 1/8 – ¼ (0.198 mi.)	Lower
Industrial	70 to 74 Clematis	3-0000501 RAO	E 1/8 – ¼	Lower

Name	Address	RTN/Status	Dist. (mi)/ Direction	Relative Elevation
Property	Ave.		(0.228 mi.)	
Gasoline Station Fmr	127-131 Linden St.	3-0000942 DEPNFA	SW 1/8 – ¼ (0.232 mi.)	Lower
Dana Athletic Ctr	500 Beaver St.	3-0024981 RAO	W 1/8 – ¼ (0.234 mi.)	Lower
Manhole Halfway Down	102 Clematis St.	3-0013361 RAO	E (0.286 mi.)	Lower
Aston Martin of New	85 Linden St.	3-0019801 RAO	SW ¼ – ½ (0.339 mi.)	Lower
Residence	73 Ellison Park	3-0021082 RAO	WSW ¼ – ½ (0.468 mi.)	Lower

RAO = Response Action Outcome, regulatory closure
PSNC = Permanent Solution No Conditions
DEPNFA = DEP No Further Action

Based on regulatory status and/or gradient from the Site, none of the above listed sites are considered a REC for the Site.

4.4 State and tribal leaking storage tank lists

The Leaking Underground Storage Tank (LUST) database is a listing of confirmed or suspected releases from underground storage tanks that have been reported to the state. The state UST database is an inventory of all regulated USTs. There are 11 Leaking underground storage tank sites (LUST) located within a 0.5-miles of the Site. The LUSTs are summarized below:

Name	Address	RTN/Status	Dist. (mi)/ Direction	Relative Elevation
UMASS Amherst Agricultural Center	240 Beaver St.	3-0015883	Target Property	-

Beaver Visitec International Inc.	411 Waverley Oaks Rd.	3-0000454 / C-2 RAO	ENE 0.292 mi.	Higher

Based on regulatory status and/or gradient from the Site, none of the above listed sites are considered a REC for the Site.

4.5 State and tribal institutional control / engineering control registries

Institutional Control: Activity and Use Limitations establish limits and conditions on the future use of contaminated property, and therefore allow cleanups to be tailored to these uses. A review of the Institutional Control List, as provided by EDR, has revealed that there are four (4) Institutional Control sites within approximately 0.5 miles of the target property.

Name	Address	RTN	Dist. (mi)/ Direction	Relative Elevation
Shell Product DIST- P	313 Waverley Oaks Rd.	3-003078	ENE 0.048 mi.	Higher
Beaver Visitec Inter	411 Waverly Oaks Rd.	3-00454	ENE 0.292 mi.	Higher

Dana Athletic CTR OF	500 Beaver St	3-0024981	W 0.234 mi.	Lower

Based on regulatory status and/or gradient from the Site, none of the above listed sites are considered a REC for the Site.

4.6 US Historical Cleaners List

EDR US Historical Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, Laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns but may not show up in current government records searches. There are no historical cleaner sites located within 0.5 miles of the Site.

4.7 Other Databases

NPL, Delisted NPL, CERCLIS & NFRAP Sites

The National Priority List (NPL) is the United States Environmental Protection Agency (USEPA) database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund program. The Delisted NPL is the database of delisted Superfund sites. The Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) List contains sites which are either proposed to be or on the NPL, and sites which are in the screening and assessment phase for possible inclusion on the NPL. No Further Remedial Action Planned (NFRAP) sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly, or the contamination was not serious enough to require federal Superfund action or NPL consideration.

No NPL, delisted NPL, or NFRAP sites were identified within the study radii. One CERCLIS site was identified ¼ - ½ ENE of the site, Duffy Bros Construction Inc. located at 411 Waverley Oaks Road.

RCRA Facilities

Regulated hazardous waste activity is tracked under the Resource Conservation and Recovery Information System as defined by the Resource Conservation Act (RCRA). Facilities that treat, store or dispose of hazardous waste are listed in the RCRA TSD database. Facilities that generate hazardous wastes are listed in the RCRA Generators (RCRA GEN) database. This database includes facilities that generate at least 1,000 kg/month of non-acutely hazardous waste or 1 kg/month of acutely hazardous waste, referred to as large-quantity generators, and those that generate less than 1,000 kg/month of non-acutely hazardous waste, referred to as small-quantity generators. RCRA facilities which have had a release of hazardous waste or constituents to the environment, for which the government is requiring corrective action, are tracked in the Corrective Action Tracking System (RCRA COR) database, while generators that are known to have violated RCRA regulations are tracked in the RCRA violations and enforcement (RCRA Viol). These violations can be the result of paperwork problems and are not necessarily related to releases of hazardous material.

No RCRA COR, RCRA TSD were identified. There are nine (9) RCRA GEN facilities identified within a 0.25 mi radius of the site that generates less than 100 kg of hazardous waste:

Name	Address	Dist. (mi)/ Direction	Relative Elevation
University of Massachusetts Experiment Station	240 Beaver St.	Target Property	-

ERNS Incidents and Spills 1990 Sites

The Emergency Response and Notification System (ERNS) is a national database containing records of releases of oil and hazardous substances reported to the USEPA, U.S. Coast Guard, the National Response Center and the Department of Transportation, since 1986.

A release of gasoline was reported at the site (240 Beaver Street Parcel) on January 6, 1998 following a failed tank tightness test on January 5, 1998. It was reported that 196 gallons of gasoline was released. The gasoline UST was removed and 100 cubic yards of gasoline impacted soil removed from the site on January 12, 1998. Pennoni Associates completed a tank closure report dated March 13, 1998. The record is currently listed as closed.

Hazardous Waste Generator Database and Sites

Permanent generator identification numbers for all Massachusetts generators of hazardous waste and waste oil that have registered with or notified MassDEP of their hazardous waste activities. A review of the HW GEN list, as provided by EDR, has revealed that there are nine (9) HW GEN sites within approximately 0.25 miles of the target property.

Name	Address	Dist. (mi)/ Direction	Relative Elevation
U-Mass Waltham	240 Beaver St.	Target Property	-
Gasoline Station	225 Waverly Oaks Ave.	E 0.032 mi.	Lower

Light Metal Platers LLC.	70 Clematis Ave.	E 0.228 mi.	Lower

FINDS & TRIS Database Sites

The Facility Index System (FINDS) report is a computerized inventory of all facilities that are regulated or tracked by the USEPA. These facilities are assigned an identification number that serves as a cross-reference for other databases in the USEPA's program system. The Toxic Inventory Information System (TRIS) report contains information concerning the industrial release and/or transfer of toxic chemicals, as reportable under Title III of the Superfund Amendments and Re-authorization Act of 1986 (Sara Title III). Inclusion on this database is required for facilities which release reportable amounts of chemicals into the environment.

Nine (9) FINDS sites were found within a 0.25 mile of the target property.

Name	Address	Dist. (mi)/ Direction	Relative Elevation
U-Mass Eastern Extension Center	240 Beaver St.	Target Property	-
Xerox Reproduction Center	135 Beaver St	E 0.077 mi.	Lower
Peirce Brother Oil Service Inc.	329 Waverly Oaks Ave.	ENE 0.083 mi.	Lower
Lockhead Martin Advance Energy Storage	117 Beaver St.	E 0.116 mi.	Lower
Electro Painters Inc.	97 Beaver St.	E 0.147 mi.	Lower
Genome Therapeutic Corp.	100 Beaver St.	ESE 0.152 mi.	Lower

Eyegate Pharmaceutic Corp.	100 Beaver St.	ESE 0.152 mi.	Lower
Thornton Associates Inc.	87 Beaver St.	E 0.179 mi.	Lower
Kans Engineering & Model Shop	83 Beaver St.	E 0.228 mi.	Lower

No TRIS sites were identified on the target property.

The Site is not listed on any other databases. Due to the distance and regulatory status of the identified Sites within the search radius, these Sites are not considered RECs at this time.

4.8 Additional Environmental Record Sources

CDW contacted the following local agencies for information regarding any hazardous materials response incidents, chemical storage or releases, or notices of environmental violations at the subject property.

4.8.1 City of Waltham Fire Department

Currently no permits for underground storage for oil or hazardous materials exist for the site.

Former UST's include one 1,000-gallon UST removed in February 1983, one 1,000-gallon UST removed in December 1991, one 1,000-gallon UST removed in December 1992, one 500-gallon fuel oil UST removed in December 1992, and two former 7,500-gallon fuel oil UST's located to the south of the former boiler plant building were reportedly removed in 2001.

4.8.2 City of Waltham Board of Health

On April 30, 2019, CDW personnel visited the City of Waltham Health Department to review pertinent environmental records. Health Department personnel indicated that there were no environmental records on file with the Board for the subject Site and indicated the MassDEP had files related to the Site.

4.8.3 City of Waltham Building Department

On April 30, 2019, CDW personnel visited the City of Waltham Building Department to review pertinent building records. No files were reviewed which related to potential environmental concerns.

4.8.4 City of Waltham Water and Sewer

The Site is serviced by municipal water and sewer. Water service enters the building from Beaver Street. Water is supplied by the Massachusetts Water Resources Authority (MWRA).

Sanitary sewer discharges into the municipal sewer system on Beaver Street.

4.8.5 Waltham Experiment Station, Study of Existing Conditions, Development Potential, and Alternative Future Development Options (2010)

This report summarizes the site history as agricultural on Parcel 1 since approximately 1923. In the 1960s, Parcel 1 became the Massachusetts Experiment Station. Two areas were noted on Parcel 1 as used for experimental fly ash and sludge applications. Parcel 2 contains a wetland, a meadow and forested vegetation that slopes up to farmhouse buildings. A fly ash experimental area was located in the south-central portion of the Parcel, within the mapped wetlands.

4.8.6 Massachusetts Department of Environmental Protection

Historical releases at the Site are summarized from the below reports obtained from the MassDEP.

1991 Unknown Release

A release of gasoline was reported at the site (240 Beaver Street Parcel) on January 6, 1998 following a failed tank tightness test on January 5, 1998. It was reported that 196 gallons of gasoline was released. The gasoline UST was removed and 100 cubic yards of gasoline impacted soil removed from the site on January 12, 1998. Pennoni Associates completed a tank closure report dated March 13, 1998. The record is currently listed as closed.

RTN 3-28048 (Parcel 1)

On October 6, 2008, the MassDEP was notified of a 120-Day Notification Condition when the presence of petroleum exceeded applicable RCs during a due diligence subsurface investigation. The MassDEP assigned RTN 3-28049 to the Site.

Two 7,500-gallon USTs containing fuel oil were located adjacent to the Boiler Building. They were installed in 1965 and were tested as tight in 1998 before removal in 2001. These USTs once provided fuel to power the boiler and steam heating system. This system is now fueled by natural gas delivered via a natural gas main. There was a 500-gallon UST containing gasoline adjacent to the boiler house which was installed in 1938 and removed in 1998. Historically, the boiler condensate was discharged into dry wells adjacent to the boiler house. The dry wells on the site were reportedly decommissioned prior to the environmental investigations conducted on the property.

Between 2006-2008, Environmental Compliance Services (ECS) completed a Phase I ESA and subsequent investigations identifying soil and groundwater contamination above the MCP reportable concentrations, likely resulting from the USTs or dry wells described above. Fuel oil and gasoline-related contaminants were identified approximately 14-16 ft below the ground surface (bgs) and deeper. The soils above this depth did not have concentrations of contaminants over the RCs.

Groundwater was identified as flowing northward and was located around 10-12 ft bgs.

At the time of these investigations, the possible sources of contamination (USTs, dry wells) had been removed several years prior. There were no sources identified that were still located in the disposal area or could be considered an ongoing source. Due to the lack of ongoing sources and a subsequent risk characterization concluding a level of No Significant Risk exists at the site as a result of the release, a permanent solution was achieved and a Class B-1 RAO was submitted in October 2009. The location of this RTN and disposal Site area is depicted in Figure 4.

RTN 3-28049 (Parcel 2)

On October 6, 2008, the MassDEP was notified of a 120-Day Notification Condition when the presence of heavy metals exceeded applicable RCs during a due diligence subsurface investigation. The MassDEP assigned RTN 3-28049 to the Site. The source of heavy metals was identified as the disposal of fly ash. ECS submitted a Phase I Initial Site Investigation and Tier Classification to the MassDEP on October 5, 2009. The Site was classified as Tier II based on a numerical ranking score of 272. ECS determined that a Permanent Solution was not feasible for the Disposal Site. To achieve a Permanent Solution, at a minimum, it would be necessary to demonstrate that heavy metals, namely lead, zinc and cadmium in soil and cadmium in groundwater were no longer present at concentrations that present a Significant Risk to human sensitive receptors, currently or in the future, at the Disposal Site. Therefore, on October 24, 2011 ECS submitted a Combined Phase II, III and Class C-1 RAO Statement. A Periodic Review of the Temporary Solution was conducted in July 216 by Ramboll Environ. Ramboll concluded that given no newly devised technologies had been developed since submittal of the Class C-1 Temporary Solution RAO Statement in October 2011, a Permanent Solution was still not feasible. The next 5-year Periodic Review Opinion is due October 2021. There is currently a fence surrounding the fly ash experimental area to limit access. The location of this RTN and disposal Site area is depicted in Figure 4.

RTN 3-28050 (Parcel 1)

On October 6, 2008, the MassDEP was notified of a 120-Day Notification Condition when the presence of heavy metals was identified exceeding applicable reportable concentrations (RCs) during a due diligence subsurface investigation. The source of heavy metals was identified as the disposal of fly ash. The MassDEP assigned RTN 3-28050 to the Site. A Release Abatement Measure (RAM) Plan was submitted on May 20, 2009 documenting the proposed remedial soil excavation activities to attempt to reach background concentrations at the Site. ECS submitted a Class A-1 Response Action Outcome was submitted to the MassDEP in October 2009. The Report documented RAM Completion activities that included the removal of 173 tons of impacted soil to Pin Tree Landfill in Hampden, Maine. The excavation area was approximately 61 feet by 35 feet and to a depth of 1 to 2 feet below ground surface. The RAO A-1 documented that a level of "No Significant Risk" exists at the Site and that all uncontrolled sources have been eliminated. The location of this

RTN and disposal Site area is depicted in Figure 4.

4.9 Physical Setting Sources

CDW reviewed several sources of publications including the United States Geological Survey (USGS), the Federal Emergency Management Agency (FEMA) Maps, the United States Department of Agriculture (USDA) Soil Survey, MassGIS and EDR, Inc. to gather information pertaining to the subject property and the physical setting source.

There are no drinking water source areas or private well supplies within 500 feet of the Disposal Site such that exposure via a drinking water pathway does not exist at the Disposal Site. The Site is not located within a Potentially Productive Aquifer and no community or known non-community drinking water supply, or MassDEP-approved or interim wellhead protection areas, exist within one mile of the Site. The Site is also not located beyond 500 feet of an active water supply line.

Federal Emergency Management Agency Flood Insurance Rate Maps indicate that the wet meadow wetland basin is located in a Zone A2 floodplain which is defined as an area within the 100-year flood zone where base flood elevations and flood hazard factors have been determined. The periphery of this area is designated as a Zone B floodplain, which is defined as an area between the 100 year and the 500-year flood limits. The remainder of southern parcel is located in Zone C floodplain which is outside of the 500-year flood limit (**Figure 3**).

There are no Open Space areas with 0.5-miles of the site. There are no Natural Heritage mapped areas, Priority or Rare Species Habitats, or Areas of Critical Environmental Concern (ACEC) mapped on the Site. There are certified no vernal pools or Estimated Habitat of Rare Wildlife within 0.5-miles of the Site.

The Site is located between 48 and 58 feet above sea level, and the topography is generally hilly. Bedrock is not exposed at or near the Site however according to the USGS geological map the bedrock at the Site consists of diorite and gabbro (Zdigb) (Zen et. al. 1983). The Salem Gabbro-Diorite is described as a Proterzoic mafic plutonic rock that retains its igneous texture with some feldspars and mafic minerals altered to chlorite and epidote. There are no bedrock outcrops at the Site.

According to the 2011 RAO prepared by ECS, surface soils at the Site consist of silt sands and organic rich soils and sediment in the wetlands area. Based on the specific parameters presented above groundwater seepage velocity in feet per day (fpd) or feet per year (fpy) was estimated for the Site areas summarized below:

Site Location	Hydraulic	Porosity	Hydraulic	Vs in	Vs in

	Gradient		Conductivity	ft/day	ft/year
Upland field-forested wetland	0.018 ft/ft	0.45	2.83 ft/day	0.11	41
Forested wetland	0.028 ft/ft	0.45	2.83 ft/day	0.18	64
Forested wetland- wet meadow	0.023 ft/ft	0.45	2.83 ft/day	0.15	53
Within the wet meadow	0.029 ft/ft	0.45	2.83 ft/day	0.18	67

The nearest surface water body to the site is an unnamed body of water approximately 400 feet the northwest of 225-227 Beaver Street parcel. The Waltham water supply comes from the MWRA. The MWRA system obtains its water primarily from the Quabbin Reservoir in western Massachusetts and Wachusett Reservoir in Clinton Massachusetts. All of Waltham's wastewater discharges into the MWRA Sewer System.

4.10 Other Historical Use Information

CDW researched several sources of historical information to identify the approximate year of development of the subject property and to determine the past use of the subject property since its initial development. Such sources included, but were not limited to, the research and review of tax assessor records, historical aerial photographs, historical Sanborn Maps, topographic maps, and chain-of-ownership records. Sanborns maps were not available for the property. Below is the information compiled for the Site.

Waltham Tax Assessors Office

According to Waltham Tax Assessors office records, the Massachusetts Agricultural College Field Station was located at 240 Beaver Street in 1923. According to records, the two parcels have been the location of the agriculture experiment station since 1922. Prior to this time, Parcel 2 was privately owned and was the location of Cedar Hill Dairy Farm.

Aerial photographs

Aerial photographs were obtained from EDR. Based on aerial photography from 1938, 1957, 1960, 1969, 1970, 1978, 1980, 1986, 1995, 2008, 2012, and 2016, the Site is shown as an agriculture property to the south and a residence and wetlands to the north.

An aerial photograph dated 1938 shows the Site as being agricultural surrounded by undeveloped land to the west, residential to the south and east, and the Fernald School Property to the north.

Aerial photographs from 1955 to 1986 identified an unnamed Above Ground Storage Tank (AST) farm within bermed areas approximately 250 feet to the east of both properties. In addition, the

aerial photographs show undeveloped land to the southeast and northwest, residential land to the south and southwest, and the Fernald School Property to the north. The Site remains agricultural.

An aerial photograph dated 1995 through 2016 shows the AST tank farm to the east having been dismantled and now includes commercial property. Areas surrounding the site to the north, west, and south remain residential or undeveloped. The Site has remained agricultural.

Based on historical data reviewed and limited information provided from the Waltham Assessors' office, it is CDW's opinion that a full title search would not have provided any significant additional information.

Deed Restriction

According to the Off-Campus Property Report of July 20, 2002 the Waltham Experiment Station has a covenant placed on the deed. The covenant states that if the University discontinues the use of the land for teaching and research, the property will be granted to the City of Waltham. According to the 2002 Report, the property does not need to be solely used for agricultural purposes but does need to remain in educational use by the University. The above reference covenant was again verified in a report to the University of Massachusetts dated January 2010.

V FINDINGS

CDW has performed this Phase I Environmental Site Assessment of the Subject Property in conformance with the scope and limitations of ASTM Standard E 1527-13 of 240 Beaver Street and 225-227 Beaver Street, in Waltham, Massachusetts. This assessment did identify evidence of recognized environmental conditions (RECs) in connection with the Subject Property.

The following CREC was identified during the assessment:

> A CREC was identified on the northern Parcel 2 located at 225-227 Beaver Street where a portion of the parcel is identified as a Massachusetts Waste Disposal Site that has been assigned Release Tracking Number (RTN) 3-28049 for a release of heavy metals. A Class C-1 Response Action Outcome (RAO) was filed with Massachusetts Department of Environmental Protection (MassDEP) in November 2011 stating a condition of No Significant Risk of harm to human health exists for all current uses of the Disposal Site Area (DSA) and that it is infeasible to reach a Permanent Solution. The C1 RAO stated the disposal site boundary must be controlled with a fence. In 2011, a 6-foot tall chain link fence was installed around the DSA. A Periodic Review is conducted every five years. The last Periodic Review was conducted in July 2016 by Ramboll Environ.

The following HREC was identified during the assessment:

- An HREC was identified on the southern Parcel 1 located at 240 Beaver Street where a portion of the parcel is listed as a Massachusetts Waste Disposal Site that has been assigned Release Tracking Number 3-28048 for a release of oil. A Class B-1 RAO was submitted to MassDEP on October 5, 2009 as assessments of the release have demonstrated that No Significant Risk exists as a result of the release and therefore site closure has been achieved.

- An HREC was identified on the southern Parcel 1 located at 240 Beaver Street where a portion of the parcel is listed as a Massachusetts Waste Disposal Site that has been assigned Release Tracking Number 3-28050 for a release condition of heavy metals in soil. A Class A-1 RAO was submitted to MassDEP on October 11, 2009 after soil remediation was completed, demonstrating that No Significant Risk exists as a result of the release and therefore site closure has been achieved.

No overt evidence of inappropriate waste-dumping or suspect waste disposal pits was observed during the Site inspection. No areas of distressed vegetation were observed on the Site. No visible evidence of releases of oil or hazardous materials was observed at the Site. Due to the distance and regulatory status of the identified (non-DPS) MassDEP, LUST, UST, RCRA HW Gen or Drycleaners within the search radius, these sites are not considered RECs at the time of this report.

VI CONCLUSIONS

CDW has completed Phase I Environmental Site Assessment in conformance to the scope and limitations of ASTM Practice E 1527-13 of the Site at 240 Beaver Street and 225-227 Beaver Street in Waltham, Massachusetts. As of the date of this report, there are RECs in connection with the Site.

There are no AULs or engineering controls with respect to the historical release(s).

Data Gaps

Based on the information obtained during this ESA, it is the professional opinion of CDW Consultants that historical data failures, as defined in the ASTM guidelines, has occurred as follows:

- The possible residual contamination from the release of gasoline in the area of the former 1,000-gallon gasoline UST located by greenhouses 3 and 4.

- The possible residual contamination from the two former 7,500-gallon USTS's located south

of the Boiler House.

- The possible residual contamination from the former "fly ash" areas located at both 225-227 Beaver Street and 240 Beaver Street.
- The possible residual pesticide or herbicide contamination as a result of storage within the pesticide building, and usage at the property.
- Surface soil impacts from arsenic based materials used around greenhouses 1 to 4.
- Any unknown subsurface impacts to former drywells located in the northeast portion of 240 Beaver Street

These data gaps cannot be resolved without subsurface exploration and land disturbance. Furthermore, no definitive conclusions can be made regarding any subsurface conditions at the Site without the completion of soil and groundwater sampling and analysis which were outside of the scope of this Phase 1 ESA.

No assessment of the potential for asbestos in building materials or soil was reviewed or performed as part of this scope or work.

CDW reviewed the document entitled, Waltham Experiment Station, Study of Existing Conditions, Development Potential, and Alternative Future Development Options. The section on the Regulated Building Materials Survey (RBMS) listed the following locations as containing asbestos containing materials (ACM):

- Countertops and panels in the Parcel 1 Administration Building;
- Inside the laboratory, inside the sink countertops and panels in the Parcel 1 Gray Building;
- In the boiler smokestack in the Parcel 1 Boiler Building;
- In the linoleum floor located inside the Parcel 2 Farm House;
- In the asphalt roof shingles and transite panels within the Parcel 2 Main Barn;
- In the building materials within the Parcel 2 cow barn;
- In the building materials and shingles of Parcel 2 sheds 1 and 2.

National Emission Standards for Hazardous Air Pollutants (NESHAP) regulations require sampling potential ACBM prior to demolition or extensive renovation, regardless of the date of construction; therefore, if such activities are planned, it may be required to conduct a survey of the entire facility,

or that portion slated for renovation or demolition, before initiating such destructive activities. That survey should include an assessment of all subject building materials, including those in areas which are normally inaccessible. Any material found to be ACBM should be handled in accordance with applicable regulations.

VI LIMITATIONS

1.1 Purpose

CDW Consultants, Inc. (CDW) performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of the ASTM E1527-13 Standard. The purpose of the assessment was to evaluate the Site history, observable conditions, and current Site use to identify potential presence of Recognized Environmental Conditions (RECs) at or associated with the Site. RECs are defined by ASTM as:

"The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."

HRECs are defined by ASTM as:

"A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls). Before calling the past release an HREC, the EP must determine whether the past release is a REC at the time the Phase I ESA is conducted (e.g., if there has been a change in the regulatory criteria). If the EP considers this past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC."

CRECs are defined by ASTM as:

"A REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a NFA letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls).

The conclusions are intended to help the user evaluate the "business environmental risk" associated with the Site, defined by ASTM as:

"A risk which can have a material environmental or environmentally-driven financial impact on the business associated with the current or planned use of a parcel of commercial real estate. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations."

1.2 Detailed Scope of Services

The CDW investigation consisted of the following elements: A Site reconnaissance, a review of available historical documents associated with the Site; a review of local, state, and federal environmental databases; and interviews with the Site owner, city officials, and agency employees.

1.3 Significant Assumptions

CDW assumes that all available Site information has been provided by the owner or its representative, that the information reviewed and provided by the Site users, owner(s), the City, and information databases are accurate, current, and complete. Where portions of the Site were inaccessible, CDW assumes that Site conditions in those areas would not contradict any observations made herein.

There is a possibility that even with the proper application of these methodologies that there may be conditions that exist on the subject property that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. CDW believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, CDW Consultants cannot and does not warrant or guarantee that the information provided by these sources is accurate or complete. The methodologies of this

assessment are not intended to produce all-inclusive or comprehensive results, but rather to provide the Client with information relating to the subject property.

1.4 Limitations and Exceptions

The conclusions of this report are limited to the information available at the time of the investigation and the scope of services as defined. No subsurface exploration was performed on this Site; therefore, no conclusions can be made relative to subsurface conditions or the presence or absence of soil or groundwater contamination from either on-Site or off-Site sources.

Where access to portions of the Site was unavailable or limited, CDW renders no opinion as to the presence of oil or hazardous material or the presence of indirect evidence related to oil or hazardous material in that portion of the Site.

No other conclusions, interpretations, or recommendations are contained or implied in this report other than those expressed. CDW makes no warranty, expressed or implied, on the accuracy of the work and information completed by others and upon which CDW has relied to prepare this report. No other use of this report is warranted without the written consent of CDW.

Events occurring on the subject property after April 30, 2019, the date of the inspection, are beyond the scope of this report. CDW makes no expressed or implied representations or warranties regarding any changes in the condition of the premises after this date from on-site or off-site sources.

1.5 Special Terms and Conditions

This Phase I ESA was conducted as part of a study for potential acquisition. There were no other special Terms or Conditions.

1.6 User Reliance

This report is intended for the use of the entities listed below and may be relied upon for up to one year after the date issued. No other individuals or entities may rely upon the report contents, in part or in whole.

Authorized User: City of Waltham

1.7 Additional Services

No soil, groundwater, surface water or other media testing was conducted as part of this assessment. A wetlands survey was not performed. A comprehensive asbestos and hazardous building material survey was not included. A professional title search was not included.

The conclusions of this report are limited to the information available at the time of the investigation and the scope of services as defined. No subsurface exploration was performed on this Site; therefore, no conclusions can be made relative to subsurface conditions or the presence or absence of soil or groundwater contamination from either on-Site or off-Site sources.

Where access to portions of the Site was unavailable or limited, CDW renders no opinion as to the presence of oil or hazardous material or the presence of indirect evidence related to oil or hazardous material in that portion of the Site.

XII SIGNATURE AND QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL

The investigation of the Site described in the report was performed by Alan Sundquist, Project Manager, who is qualified to make investigations and formulate the opinions herein set forth. Alan has 28 years of experience performing environmental site assessments. He has a Bachelor of Science degree in Geology from the University of Maine, Orono.

The Site Investigator is knowledgeable regarding the type of industrial, manufacturing, commercial or other processes or operations which might reasonably be expected to generate, use, treat, store or dispose of oil or hazardous material. The Site Investigator has reviewed the recent history of the Site and has considered the potential for the generation, use, treatment, storage or disposal of oil or hazardous material by (a) the uses presently associated with the Site and (b) to the extent ascertainable by inquiry, the uses previously associated with the Site.

This report is dated July 1, 2019 and is signed by individuals who are duly authorized to do so.

Alan Sundquist
Geologist

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Aerial Photo Decade Package

12/07/18

Site Name:

Beaver St Waltham
225-227 and 240 Beaver Stree
Waltham, MA 02452
EDR Inquiry # 5505005.8

Client Name:

CDW Consultants Inc.
6 Huron Drive
Natick, MA 01760
Contact: Rachel Stevens

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

Year	Scale	Details	Source

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by CDW Consultants Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 08/13/2018 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

LOCKHEED MARTIN ADVA EPA ID:: MAC300101565	***117 BEAVER ST***	***E 0 - 1/8 (0.116 mi.)***	***D27***	***134***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 3 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State and tribal registered storage tank lists

MA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection's Summary Listing of all the Tanks Registered in the State of Massachusetts.

A review of the MA UST list, as provided by EDR, and dated 11/02/2018 has revealed that there are 4 MA UST sites within approximately 0.25 miles of the target property.

State and tribal Brownfields sites

MA BROWNFIELDS: Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields,

while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

A review of the MA BROWNFIELDS list, as provided by EDR, has revealed that there is 1 MA BROWNFIELDS site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there are 15 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

NY MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the NY MANIFEST list, as provided by EDR, and dated 07/01/2018 has revealed that there are 2 NY MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

UNIVERSITY OF MASSACHUSETTS EXPERIMENT S (Continued) **1000881546**

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Environmental Interest/Information System

UMASS EASTERN EXTENSION CENTER (Continued) **1016094507**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No

MOTIVA ENTERPRISES LLC (Continued) **1015743259**

Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 08/30/2005
Site name: MOTIVA ENTERPRISES LLC
Classification: Small Quantity Generator

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D008
. Waste name: LEAD

. Waste code: D018
. Waste name: BENZENE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: D040
. Waste name: TRICHLOROETHYLENE

User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Classification: Not a generator, verified

. Waste code: D001

DUFFY ASSOCIATES (Continued) **1000287804**

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: K049

Action Date: 10/28/1999
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Activity and Use Limitation
Action Status: Transmittal, Notice, or Notification Received
Action Date: 10/28/1999
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: An activity type that is related to an Audit
Action Status: NAFNVD
Action Date: 10/6/2005
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: A Notice sent to a Potentially Responsible Party (PRP)
Action Status: A MassDEP piece of correspondence was issued (approvals, NORs, etc.
Action Date: 12/6/1999
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: A Notice sent to a Potentially Responsible Party (PRP)
Action Status: A MassDEP piece of correspondence was issued (approvals, NORs, etc.
Action Date: 2/29/2000
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Response Action Outcome - RAO
Action Status: Level I - Technical Screen Audit
Action Date: 6/27/2002
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Activity and Use Limitation
Action Status: Level II - Audit Inspection
Action Date: 8/17/2005
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: RNF
Action Status: Reportable Release under MGL 21E
Action Date: 9/14/1999

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

. Waste code:	D001
. Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS

LOCKHEED MARTIN ADVANCE ENERGY STORAGE (Continued) **1018275498**

CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: MA01
. Waste name: MA01

. Waste code: MA95
. Waste name: MA95

. Waste code: MA99
. Waste name: MA99

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MA-EPICS - Massachussetts Environmental Protection Integrated Computer System

Historical Generators:
Date form received by agency: 11/15/2006
Site name: EYEGATE PHARMACEUTICALS INC
Classification: Small Quantity Generator

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D011
. Waste name: SILVER

. Waste code: D018
. Waste name: BENZENE

. Waste code: D022
. Waste name: CHLOROFORM

. Waste code: D035

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No

GENOME THERAPEUTIC CORP (Continued) **1001219890**

Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Historical Generators:

Date form received by agency: 01/11/2005

Classification: Not a generator, verified

Date form received by agency: 04/26/1998
Site name: GENOME THERAPEUTIC CORP
Classification: Not a generator, verified

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D009
. Waste name: MERCURY

GENOME THERAPEUTIC CORP (Continued) **1001219890**

. Waste code: D011
. Waste name: SILVER

. Waste code: D022
. Waste name: CHLOROFORM

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: P048
. Waste name: 2,4-DINITROPHENOL

. Waste code: P104
. Waste name: SILVER CYANIDE

. Waste code: P106
. Waste name: SODIUM CYANIDE

. Waste code: U007
. Waste name: ACRYLAMIDE

. Waste code: U044
. Waste name: CHLOROFORM

. Waste code: U069
. Waste name: 1,2-BENZENEDICARBOXYLIC ACID, DIBUTYL ESTER

. Waste code: U103
. Waste name: DIMETHYL SULFATE

. Waste code: U123
. Waste name: FORMIC ACID (C,T)

. Waste code: U133
. Waste name: HYDRAZINE (R,T)

. Waste code: U188
. Waste name: PHENOL

. Waste code: U190
. Waste name: 1,3-ISOBENZOFURANDIONE

. Waste code: U201
. Waste name: 1,3-BENZENEDIOL

Violation Status: No violations found

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No

BRISTOL MYERS SQUIBB (Continued) **1012211013**

Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste name: MA95

. Waste code: MA99
. Waste name: MA99

Date form received by agency: 08/04/2009
Site name: BRISTOL MYERS SQUIBB
Classification: Small Quantity Generator

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES

BRISTOL MYERS SQUIBB (Continued) **1012211013**

WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste code: D005
. Waste name: BARIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D011
. Waste name: SILVER

. Waste code: D022
. Waste name: CHLOROFORM

. Waste code: F003

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste code: D022
. Waste name: CHLOROFORM

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE,

KALA PHARMACEUTICALS INC (Continued) **1019327580**

CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: MA01
. Waste name: MA01

. Waste code: MA99
. Waste name: MA99

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

FINDS:

Registry ID: 110006499994

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

. Waste code: D001

CERAMEM CORPORATION (Continued) **1007570531**

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D042
. Waste name: 2,4,6-TRICHLOROPHENOL

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN

AIR SYNTHETIC MINOR

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Action Date: 4/14/2008

WALTER E FERNALD STATE SCHOOL (Continued) **S101030598**

Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Immediate Response Action
Action Status: Written Plan Received
Action Date: 4/19/1996
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Immediate Response Action
Action Status: Written Approval of Plan
Action Date: 4/23/1996
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: RLFA
Action Status: FOLOFF
Action Date: 4/23/1996
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Phase 1
Action Status: Completion Statement Received
Action Date: 4/3/1997
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Tier Classification
Action Status: Tier 2 Classification
Action Date: 4/3/1997
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Tier Classification
Action Status: Transmittal, Notice, or Notification Received
Action Date: 4/3/1997
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Phase 2
Action Status: Scope of Work Received
Action Date: 6/18/1997
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Immediate Response Action
Action Status: Status or Interim Report Received
Action Date: 6/21/1996
Response Action Outcome: A permanent solution has been achieved. Contamination has not been

WALTER E FERNALD STATE SCHOOL (Continued) **S101030598**

reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: RNF
Action Status: Reportable Release under MGL 21E
Action Date: 6/21/1996
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Response Action Outcome - RAO
Action Status: RAO Statement Received
Action Date: 6/28/2002
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Phase 3
Action Status: Completion Statement Received
Action Date: 6/28/2002
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Release Abatement Measure
Action Status: Written Plan Received
Action Date: 6/7/1999
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: An activity type that is related to an Audit
Action Status: NOA
Action Date: 7/13/1998
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Compliance and Enforcement Action
Action Status: RFI
Action Date: 7/13/1998
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Release Abatement Measure
Action Status: Completion Statement Received
Action Date: 8/4/1999
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

FINDS:

Registry ID: 110014367826

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MA-EPICS - Massachussetts Environmental Protection Integrated Computer System

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 08/13/2018
Date Data Arrived at EDR: 10/04/2018
Date Made Active in Reports: 11/09/2018
Number of Days to Update: 36

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 08/13/2018
Date Data Arrived at EDR: 10/04/2018
Date Made Active in Reports: 11/09/2018

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State and tribal Brownfields sites

BROWNFIELDS: Completed Brownfields Covenants Listing

Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

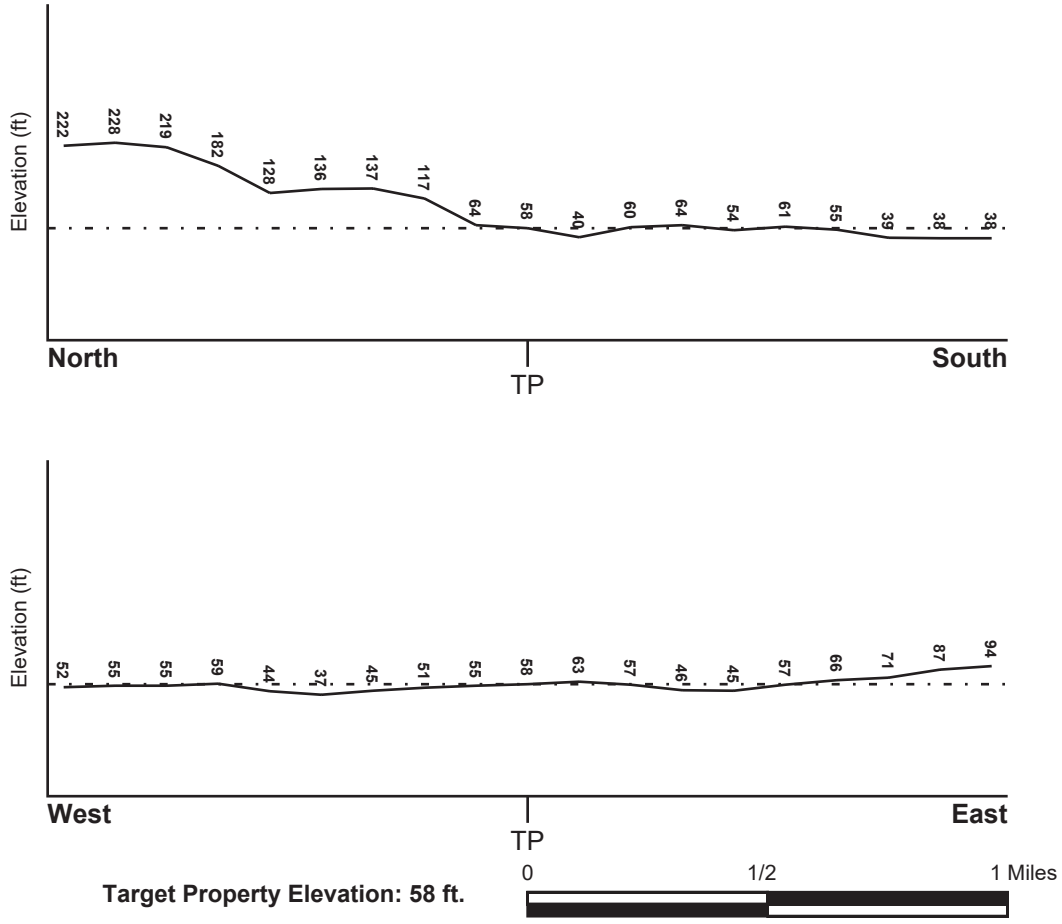

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 58 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
25017C0414E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
25017C0413E	FEMA FIRM Flood data

25017C0551E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
LEXINGTON	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
6	1/2 - 1 Mile SSW	VARIES
7	1/2 - 1 Mile SSW	SSE
1G	1/2 - 1 Mile SSW	VARIES
2G	1/2 - 1 Mile SSW	SSE

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Paleozoic
System:	Cambrian

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	MONTAUK
Soil Surface Texture:	extremely stony - sandy loam
Hydrologic Group:	Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class:	Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: LOW

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	2 inches	extremely stony - sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 0.60	Max: 6.00 Min: 3.60
2	2 inches	27 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 0.60	Max: 6.00 Min: 3.60
3	27 inches	72 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 0.60 Min: 0.06	Max: 6.00 Min: 3.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: extremely stony - fine sandy loam
muck
unweathered bedrock
very stony - fine sandy loam
sandy loam

Surficial Soil Types: extremely stony - fine sandy loam
muck
unweathered bedrock
very stony - fine sandy loam
sandy loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: gravelly - loamy sand
loamy sand
sand
unweathered bedrock
sapric material
very gravelly - loamy coarse sand
fine sandy loam
stratified

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Telephone: 617-292-5907

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Massachusetts Geographic Information System (MassGIS) Datalayers
Source: Executive Office of Environmental Affairs

Public Water Supply Database: The Public Water Supply datalayer contains the locations of public community surface and groundwater supply sources and public non-community supply sources as defined in 310 CMR 22.00.

OTHER STATE DATABASE INFORMATION

Areas of Critical Environmental Concern Datalayer: The Areas of Critical Environmental Concern (ACEC) datalayer shows the location of areas that have been designated ACECs by the Secretary of Environmental Affairs. ACEC designation requires greater environmental review of certain kinds of proposed development under state jurisdiction within the ACEC boundaries. The ACEC Program is administered by the Department of Environmental Management (DEM) on behalf of the Secretary of Environmental Affairs. The Massachusetts Coastal Zone Management (MCZM) Office managed the original Coastal ACEC Program from 1978 to 1993, and continues to play a key role in monitoring coastal ACECs. Procedures for ACEC designation and the general policies governing the effects of designation are contained in the ACEC regulations (301 CMR 12.00). The ACEC datalayer has been compiled by MCZM and DEM and includes both coastal and inland areas.

EPA Designated Sole Source Aquifers Datalayer: The Sole Source Aquifer datalayer was compiled by the Department of Environmental Protection (DEP) Division of Water Supply (DWS). Seven Sole Source Aquifers have been designated by the US Environmental Protection Agency (EPA) for Massachusetts. A Sole Source Aquifer (SSA) is an aquifer designated by US EPA as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for that area and for which there are no reasonably available alternative sources should that aquifer become contaminated. The aquifers were defined by a EPA hydrogeologist.

Aquifers Datalayer: MassGIS produced an aquifer datalayer composed of 20 individual panels, generally based on the boundaries of the major drainage basins. Areas of high and medium yield were mapped. This datalayer includes polygon attribute coding to help in the identification of areas in which cleanup of hazardous waste sites must meet drinking water standards, as defined in the Massachusetts Contingency Plan (MCP) (310 CMR 40.00000).

Non-Potential Drinking Water Source Areas: Non-Potential Drinking Water Source Areas (NPDWSA) are regulatory in nature, representing one of many considerations used in determining the standards to which ground water must be cleaned in the event of a release of oil or hazardous material. NPDWSAs are not based on existing water quality and do not indicate poor ambient conditions.

DEP Approved Zone IIs Datalayer: The Department of Environmental Protection (DEP) approved Zone IIs datalayer was compiled by the DEP Division of Water Supply (DWS). The database contains 281 approved Zone IIs statewide. As stated in 310 CMR 22.02, a Zone II is "that area of an aquifer which contributes water to a well under the most severe pumping and recharge conditions that can be realistically anticipated (180 days of pumping at safe yield, with no recharge from precipitation.) It is bounded by the groundwater divides which result from pumping the well and by the contact of the aquifer with less permeable materials such as till or bedrock. In some cases, streams or lakes may act as recharge boundaries. In all cases, Zone IIs shall extend up gradient to its point of intersection with prevailing hydrogeologic boundaries (a groundwater flow divide, a contact with till or bedrock, or a recharge boundary)." These data are used in association with the Public Water Supplies datalayer. The following describes certain unique features of this association.

- Any proposed new well which will pump at least 100,000 gallons per day must have a Zone II delineation completed and approved by DEP prior to the well coming on line.
- Additionally, a new source may not be on-line yet, but other, older wells may fall within its Zone II boundary.
- Further, existing wells must have a Zone II delineated as a condition of receiving a water withdrawal permit under the Water Management Act.

Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by CDW Consultants Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.
